ISA EDMONTON SECTION 2024-2025 PRESIDENT'S MESSAGE

I am honoured to serve as President of the ISA Edmonton Section this year alongside our exceptional executive Board, volunteers, members and contractors. ISA has been pivotal to my automation career, from my student days to current profession.

Let's Celebrate

At the global level, this fall, we'll acknowledge the countless volunteer hours of our Board and members by receiving the 2024 Section Excellence Award at the 2024 ISA ASE. Here in YEG, it's the 10th anniversary of our first-class ISA Fall Classic Invitational golf tournament, sold-out at 216 players.

Let's Grow

From both a programming and membership perspective, growth is important to me.

As the automation industry continues to evolve rapidly, embracing new technologies and methodologies, is key. Our monthly Technical Talk content will focus on trends like sustainability and energy efficiency. Plus, coming this spring... Augment Your Reality at the ISA Edmonton Section's biennial flagship event, Automation Expo & Conference (AEC), Canada's largest automation event... of note, the Digital Transformation and New Technology SUPER Tracks.

I envision that our Section will continue to be the premier hub for local automation professionals. My personal mission is to strengthen partnerships with all industry stakeholders to boost membership and engagement.

I invite anyone interested in automation — whether you're a career-seeker, seasoned professional, or if you have a passion for the field — to join ISA, it's the place to be!

ISA CALGARY SECTION

2024-2025 PRESIDENT'S MESSAGE

First off, I'd like to thank Susan Rathgeber for her dedicated service as ISA Calgary Section Administrator, she retired in June after 24 years of service. Susan, you will be missed and we wish you the very best. With that, I'm pleased to welcome Melissa Gagy, referred by yours truly (thanks again Susan), who will be filling her shoes.

Automation is all around us and in a perpetual state of development - from the digital devices that we carry, to smart homes, to business operations and complex industrial processes. With the advancement in machine learning, Artificial Intelligence

(AI), Internet of Things (IoT), and Operational Technology (OT), society has found itself in a fast paced technological revolution where automation shines - and will only become more flexible, sustainable and resilient in the times to come.

When it comes to my presidency, I want to be remembered for embracing change from both an organization and industry standpoint. Additionally, for supporting the ISA Calgary Section's continued growth (while fostering stability), in line with ISA Global's vision and core values.

What inspired me to become President?

I have been an active member of ISA since 2017. In the recent few years I have had the privilege of holding various positions within ISA Calgary section, including Membership Co-Chair, Secretary, most recently, Treasurer. These roles have allowed me to gain a deep understanding of our organization and its goals. I am keen to serve as President for the current year...

My Presidential Goals?

- Working very closely with our Executive Committee and volunteers to continue successful contributions of the ISA Calgary Section.
- Promoting ISA's value proposition.
- Increased opportunities for member engagement.
- Drive Section's membership growth.
- Strengthen internal processes and systems to reduce key person dependency simultaneously making transitions easier and more systematic for future Boards.
- Maintain a sustainable financial position to support all efforts.

I firmly believe that our section is only as strong as its members. Your involvement, enthusiasm, and engagement are vital to our collective success. I encourage you to actively participate in section meetings, monthly Technical Talks, volunteer committees, and to consider joining the executive committee in the future. Together, we can shape the future of the ISA Calgary Section and make a lasting impact on our automation community.

I invite you to stay connected with the ISA Calgary Section by visiting this website, following us on LinkedIn, and through ISA Connect.

"If we don't change, we don't grow..." - Gail Sheehy

We don't create the demand. We meet it.

Aircom is a company that believes meeting industry demands first requires relationships, trust, and a sense of urgency. We meet that demand with a system we call **The Aircom Way**. The result is a flexible approach that is executed by a team of dedicated problem solvers who are driven to excel.

PRODUCTS UNIQUE TO AIRCOM

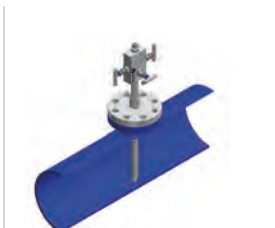

- BTB Thermocouple (Tube metal temperature) Thermocouples
- Pipe Shoe Riser
- Break-To-Length RTDs & Thermocouples
- PT (Pressure/Temperature) Thermowells
- Reactor Multipoint Temperature
- Tank Gauging Multi-Point RTD Sensor
- Instrument Valves & Manifolds
- StrakeWell™ & StrakeQuill™

MANUFACTURED PRODUCTS

- Thermocouple & RTD sensors manufactured to standard or custom specifications
- Hazardous location (CSA) approved temperature sensor assemblies
- Thermowells and protection tubes (CRN Available)
- Injection quills & sample probes (CRN Available)
- Multi-point temperature sensors
- Downhole temperature sensors
- Condensate pots and sample cylinders
- Bleed & flush rings
- Stilling well and level chambers

Looking to Reduce your Methane Venting? We have Solutions!

ELIMINATOR Solar Air Compressor

- Class 1 Div. 1, 24v DC
- Produces 60SCFH @ 30psi. Uses 48Watts/Hr. @ 20% duty
- Oil less and maintenance free design. 100% duty cycle
- Class 1 Div. 1 controller with integrated metering
- 100% contained compressor - Contaminant free air

ELIMINATOR Solar Chemical Pump

- High efficiency electric drive unit eliminates fuel gas consumption and venting.
- Capable of an extremely wide injection rate without changing plunger size.
- Smart diagnostics to detect issues with the injection pump
- Class 1 Div. 1 – Completely self-contained
- Various I/O available for RTU integration.
- Retrofit a 5100 series pneumatic injector without changing any tubing!

Need Composite Sampling?

ANALYTICAL

Our expertise in analytical solutions will assist in your system optimization for Liquid Analytical, Gas Quality, and Continuous Gas monitoring systems.

SAFETY & SECURITY

Local experts for everything from Wireless Asset Software, Portable Gas Detection, Fixed Gas Detection, Flame Detection, Controllers, to Leak Quantification.

CRITICAL POWER

Optimizing the Critical Power space with next-gen UPS Systems, Battery Monitoring & Chargers, AC/DC VFD's, Motors, Protection Disconnects and Distribution Panels.

ROTATING EQUIPMENT

We represent top-of-the-line NG, Oil-Free, Piston, Rotary and Vacuum Compressors. We also provide Air Treatment, Leak Detection, and Efficiency Quotient services.

AUTOMATION

Our automation solutions include Terminal Management, IIOT, Flow Computing, RTU/PLC Packages, Controls and Distributed I/O, Conversion to Isolation, and Functional Safety.

VALVES & ACTUATION

We will equip your process with world class Valve and Actuation solutions. Our offerings encompass a full portfolio for control, throttling, isolation, and specialty applications, both in linear and rotary designs.

HEATING & THERMAL

We are focused on providing pre-packaged and complete combustion products, controls, and heating management systems. Delivering safe, compliant, and efficient thermal processes from commercial to industrial divisions.

FIELD INSTRUMENTS

Instrumentation is our forte. We supply Pressure, Temperature, Flow, Nuclear, Multiphase and Level Measurement products for various process conditions.

#TeamUpToImprove

Process improvement is like climbing.
With a strong partner, you can overcome
any obstacle.

Just as athletes rely on their teammates, we know that partnering with our customers brings the same level of support and dependability in the area of manufacturing productivity. Together, we can overcome challenges and achieve a shared goal, optimizing processes with regards to economic efficiency, safety, and environmental protection. Let's improve together.

Hy-Lok

hylok.ca

For 40 years, Hy-Lok has been committed to providing high quality products that reduce installation costs, while maintaining reliability in your fluid systems.

Made from high quality raw materials, Hy-Lok tube fittings are fully compatible & intermixable with other leading competitors.

Two-Ferrule Tube Fittings

Vibration Resistance
Complete inter-mixability
Gaugeable
Excellent make up & re-make life

Double Block & Bleed

Two ball One needle (OS & Y)
Stainless Steel, Duplex, A105
Savings on space, weight, installation & cost
Increased safety
Easy installation and maintenance
PEEK or PCTFE seats
Fire safety designed to API 607/6FA
